

## **Moon Goddess**

The essence of your silver glow ignites around my heart,  
The energy that you bestow on me, it guides me to my path.  
You are there in times of total darkness showing me the way,  
You share my faith and watch it flourish each and every day.

You turn the tides and feel its power but its power there for all,  
A loving gift of self-expression - The gentle whisper of your call,  
The love of unconditional brightness setting mortal spirits free,  
Where the harmony of peace radiates the strength of unity!

Side by side and hand in hand together we face life's trials,  
The presence of your understanding the warmth of inner smiles,  
All encompassed and yet so personal - every spirit feels your touch,  
The beauty of your illumination to us all it means so much.

The feminine grace we share with pride - In a connection with you,  
Be it the cycle of fertility or the flow of everything we do.  
We honour you for your consideration as you watch over our sleep,  
Where your connection with the spirits and the subconscious glide so deep!
