

## **Seeds!**

Parallel lines of dissolving parameters expanding in the mind,  
Hooking in to something sacred and the secret of mankind,  
Choral designs of evolving concepts exploding into life,  
Churning through the whirlpool breeding where creation is now rife.

Iconic fields ploughing indecision blending out the doubt,  
Burning hot the constant learning let the seeds of nature sprout,  
Infinity calls with the voice of seduction to calm the fire's within,  
Turning skies to compress compulsion to a world outside the skin!
